

Global Automotive Consultancy is based in The Netherlands and operates throughout Europe for clients on wholesale and retail level.

It is specialized in different areas of the automotive market, such as:

- Remarketing of used cars
- Long-term leasing and rental cars
- Aftersales and spare parts
- Market entrée strategies

Global Automotive Consultancy delivers the answers for the present and future challenges that the automotive sector is facing, which includes market research studies, -analyses and workshops. When needed, within a Pan-European context.

In August 2011 an agreed have been reached to form a partner-relationship with B2B-automotive, in order to increase capacity by providing local support for both companies.

Another objective is to analyze the possibility of commercializing products and services together, in this way enlarging both our portfolios.
